ESDaP Summer newsletter

Don't miss our activities!

Dear ESDaP members, dear friends,

During the EADV Congress in Paris we will have a subspecialty meeting on Wednesday 12th of September 13:30-17:30. [See the program here.](#)

A psychodermatology session is scheduled on Saturday 15th of September from 13:15 to 14:45. The world famous expert Katharin Philips will give us an update on Body Dysmorphic Disorders. [See the program here.](#)

A Quality of life session will be held just after in the same room from 15:00 to 16:15. [See the program here.](#)

In November 8th to 10th an Advanced course will be held in Brussels on the practical tips to help BD patients. [Here is the registration form.](#) Check our [Facebook page!](#)

This is your first step to the ESDaP Diploma in Psychodermatology. Hurry up there are some places left!

And last but not least our next Congress is arriving on 20-22 June 2019. [Website link here.](#)

Don't miss all these opportunities to be a recognized psychodermatologist

Check [our website!](#)

Future ESDaP congresses scheduled:

- 18th ESDaP Congress – Giessen – Germany 2019
- The 19th ESDaP Congress will be held in London UK in 2021

Towards the new congress

SAVE THE DATE

European Society for Dermatology and Psychiatry

18th Congress

20-22 June 2019

Giessen, Germany

The skin patient –
a multidisciplinary
challenge?

We invite all ESDaP members and persons interested in the field of psychodermatology to participate in the 18th ESDaP-Congress, which will take place in Giessen, Germany, from June 20th to June 22nd 2019.

The Congress focuses on „The skin patient – a multidisciplinary challenge“. The exciting and diversified program includes keynote lectures, symposia and many chances for young scientists to present their work to a big audience.

There will be keynote lectures on itch, psychotherapy for skin patients and patient education. Additionally, symposia on stigmatization, psychosomatics, psychoneuroimmunology, patient education and e-health offer the possibility to discuss these topics from different perspectives.

Friday morning will be especially dedicated to young scientists. During that time, junior as well as mid-term career scientists will have the opportunity to present their work and be awarded prizes for the best oral presentations as well as poster presentations. Moreover, young scientists will be able to meet experts in the field of psychodermatology and discuss relevant topics of scientific work during a mentoring lunch.

For more information on the Congress, please visit the Congress website: <http://www.uni-giessen.de/fbz/bf11/esdap2019>.

We are looking forward to welcoming you in Giessen next year!

What's up in ESDaP Projects

Update ESDaP study I and II, September 2018

The ESDaP initiated two ongoing multicenter studies on the psychological burden of common skin diseases in Europe.

The first dataset on 5000 participants resulted in 11 publications in high ranking dermatological journals. The data collection of the second multi-center study is currently running and the ethical approval has been obtained in all 16 participating countries in Europe. A dataset of 6000 participants is expected and will enable to explore further the burden of skin diseases with a focus on itch, mood disorders, stigmatization and body image disorders.

The most recent publications from our research group are the following:

-The prevalence, chronicity and intensity of itch in patients with skin diseases: results from a multicenter study in 13 countries Schut et al Accepted for publication Acta DV 2018

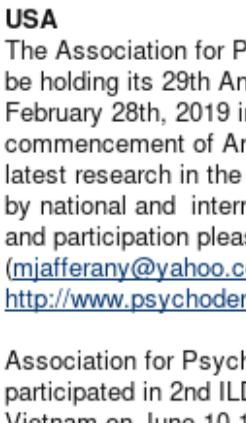

-The self-assessed psychological comorbidities of prurigo in European patients: a multicenter study in 13 countries Brenaut et al J Eur Acad Dermatol Venereol. 2018

-The Role of Therapy in Impairing Quality of Life in Dermatological Patients: A Multinational Study. Balieva et al Acta Derm Venereol. 2018 Jun;88(6):563-569

-The psychosocial burden of hand eczema: Data from a European dermatological multicentre study. Marron et al Contact Dermatitis. 2018 Jun;78(6):406-412

-Dermatologists across Europe underestimate depression and anxiety: results from 3635 dermatological consultations. Dalgard et al Br J Dermatol. 2018 Aug;179(2):464-470

New members

Rick Waalboer-Spuij is a dermatologist working in the Erasmus MC in Rotterdam and the ETZ in Tilburg, NL. He runs a multidisciplinary psychodermatology outpatient clinic and is working on his PhD thesis about quality of life in nonmelanoma skin cancer for which he was recently rewarded the Herman Musaph literature prize 2018.
